Flutter Installation:-

Step: 01

I   Installed flutter SDK   then
I   Downloaded flutter from
flutter's official website.

Step: 02

I   openned visual studio code,
from title bar, selected view
and then command Palette
Then i chosed project type as
flutter application and provided
valid project name in lower
case.

Step: 03   Then I

openned the project and then
openned the lib folder where
is the main.dart then I coded
for Counter application.
after coded I selected the "run"
and select chrome for
debagging and run the code.
